London, 1604 £7 10s

The first two books of Acosta treat of ancient ideas of a new world, of the 'Atlantis' of Plato, of antipodes and how peopled; of zones inhabitable and uninhabitable, and were written in Latin in Peru as of things present.* The remaining five books were written in Europe as of things absent, and describe the natural features and properties of the different provinces of North and South America—the rivers, volcanoes, trees, plants, animals; the religion, government, laws, arts, occupations, &c., of the peoples, especially of the inhabitants of Peru and Mexico.

The introductory history on navigation is supposed to have been written, and the collection (*i.e.*, the first four volumes) is said to have been made under the direction of John Locke, the philosopher. Voyages relating especially to America are the following :—

According to Washington Irving this "Life" of Columbus was composed in Spanish, translated into Italian, and from that into other languages; but (so far as he knew) it existed only in Spanish—a retranslation from the Italian. If this is true it tends to support a recent argument that the work is a forgery, although Irving thought it "an invaluable document, entitled to great faith," and the "corner stone of the history of the American Continent." H. H. Bancroft also inclines to a belief in its authenticity.

Chart and views of coast at different points by Bligh and Webber are bound up with the text. At Cook's River [Inlet], in 61° N., he sent Capt. King ashore and took possession of the country (June 1, 1778).

The intercourse along the coast with the natives was pleasant, and their habits, weapons, clothing, are minutely described, and (on plates 38 to 58) their portraits, with their habitations, pictured. A vocabulary of the language spoken by the natives at Nootka Sound is printed at the end of the third volume. Returning to the Sandwich Islands in November, 1778, Cook was there killed on Feb. 14th, 1779. Vols. I. and II. were written by Capt. Cook, Vol. III. by Capt. James King.

181 — *A Voyage Round the World, 1785-88*, translated from the French, 3 vols. 8vo, with *ATLAS* of Charts and Plates, folio, half-calf. 1807 £1 10s

La Pérouse's expedition visited Madeira, Teneriffe, Trinidad, and Martin Vaz, the coasts of Brazil, Patagonia, Chili, Easter Island, and the Sandwich group. After the N.W. coast of America was surveyed from Mount St. Elias to Monterey Bay the Pacific was then crossed to China, the Philippines, Tartary, and Kamtchatka. From this point the vessels proceeded to the Samoan and Tongan groups and Port Jackson. Sailing thence early in 1788, no tidings reached Europe of the expedition for nearly forty years. Observations on the natives of Chili, California, &c., by M. Rollin, and other descriptions by M. de la Monneron are given in Appendices. The *Atlas* contains 40 plates, views and charts of surveys. A brief account of La Pérouse's previous career is given in the introduction. He was engaged in eighteen campaigns, including that against the English off Belleisle in 1756, at Grenada in the West Indies 1779, and the capture of the "Ariel" on the coast of New England in the same year. In the following year he engaged an English squadron off Cape Breton, and in 1782 captured the Hudson Bay Company's forts.

Narratives of a voyage from Manila to New Guinea, Tonga, thence to San Blas (California), in 1780-81, and to the N.W. Coast of America in 1779, both by Don F. A. Maurelle, are prefixed to the narrative of La Pérouse in the first volume. A preceding voyage by Maurelle to N.W. coast, 1775, is printed in Barrington's 'Miscellanies,' see above, p. 2.

The best Atlas of the period of Louis XIV., when France as a European Power was unrivalled. Prefaced by a Geographical Introduction written for the Dauphin by the most eminent geographer of the time, naturally all the European kingdoms, duchies, principalities, &c., are fully represented, and every map and plan is accompanied by an engraved alphabetical list of names contained upon it. The New World is represented in (1) a Mappemonde in Hemispheres, (2) North America, and (3) South America. France and Spain divide nearly the whole between them. The former apparently possesses what is now British N. America and Newfoundland and half the basin of the Mississippi. With the exception of some insignificant settlements named New England, Virginia, New Netherlands, New Sweden, Spain takes all the rest—Florida (including the other half of the Mississippi basin), West India Islands, New Spain, New Mexico, California (shown as an island), and the whole of Central and South America. The "Land of Jesso" (Japan) stretches eastward across the Pacific, separated from America by a strait in 45° N. In Central Africa great lakes are shown, as in other maps of that period, south of the equator.

All the maps in both volumes are in fine condition, and the binding is solid and sound—a very desirable copy to possess.

- 241 WALDSEEMULLER.** The Oldest Map with the Name America (Die Alteste Karte mit dem Namen Amerika), of the Year 1507, and the Carta Marina of the Year 1516, edited by Prof. Jos. Fischer, S.J., and Prof. Fr. R. v. Wieser, with 26 double-page plates and 10 textual illustrations, royal folio, half-morocco. Innsbruck, 1903 £3 3s

This handsome volume, which ranges with those of Nordenskiöld, contains reproductions of two long-lost maps by Martin Waldseemüller known as Ilacomilus or Hylacomylus, the first having been issued in connexion with the famous *Cosmographie Introductio*, printed at St. Die in 1507, the work which, attributing the discovery of the New World to Americus Vespucci, suggested that it should be named after him. The map bears the name 'AMERICA,' and was copied by many other map makers, and to this circumstance is due the fact that it has been so named ever since.

The second map 'Carta Marina' (the oldest known printed sea-chart) does not bear the name 'America,' an indication that Hylacomylus had discovered his error, for there is no evidence that Vespucci himself ever put forth any claim to discoveries made by his friend Columbus. The original of this newly discovered 'Carta Marina' bears manuscript corrections for a new edition, but these were never used; the second edition was produced by Frisius about 1525, three years after the death of Hylacomylus. The text of the volume is in German, with parallel English translation by Rev. G. Pickel of Buffalo. There are two reduced key maps (double page) and the facsimiles of the originals are each reproduced in 12 sheets.

PREPARING FOR THE PRESS.

THE DISCOVERY OF TERRA AUSTRALIS; or, South America and Australia the original Great South Continent of 16th Century Cartographers, with Bibliography, Maps, and Illustrations. By Edward A. Petherick, F.L.S., F.R.G.S., F.R.C.I., Mem. Lib. Assoc. U.K., &c.

This work, which summarizes the results of a search extending over thirty years among 16th century records, mappemondes, and globes, offers a solution of some of the enigmas of Vespucci's and other early voyages and of the misnomer "America," a name which, it has recently been argued, belongs not to AMERICA, but to a country east of Africa, that is, AUSTRALIA.

Charles Lucien BONAPARTE, 21 plates engraved on steel, beautifully coloured, 3 vols., 1825-28; in all 12 vols. imperial 4to, half-morocco, uncut. Philadelphia, 1808-28 £12

To praise this work to-day is superfluous. Wilson's highest aspiration, to "contribute to the innocent amusement and virtuous instruction of his fellow beings," has been more than realized during three generations—his work is still a delight to read as well as to look at, by all lovers of this branch of natural history.

It is noticeable that he was assisted in the engraving in the early part of his work by Alex. Lawson, who instructed him in drawing, colouring, and etching; that Charles Leslie assisted in colouring some of the plates; and that to Prince Bonaparte's section Audubon contributes some extremely interesting notes and drawings of the male and female "crow." His work differs somewhat from that of Prince Bonaparte, in the fact that it was essentially a national production—engraving, type, and paper, and nearly all the colours used being of American manufacture.

RELATING TO

THE DOMINION OF CANADA
AND NEWFOUNDLAND.

"No one can more sincerely rejoice than I do on the reduction of Canada; and this is not merely as I am a colonist, but as I am a Briton. I have long been of opinion that the foundations of the future grandeur and stability of the British empire lie in America.....I am, therefore, by no means for restoring Canada. If we keep it, all the country from the St. Lawrence to the Mississippi will in another century be filled with British people. Britain itself will become vastly more populous by the immense increase of its commerce; the Atlantic sea will be covered with your trading ships; and your naval power, thence continually increasing, will extend your influence round the whole globe, and awe the world.... But I refrain, for I see you begin to think my notions extravagant, and look upon them as the ravings of a mad prophet."

BEN. FRANKLIN to LORD KAMES, 3rd January, 1760.

Sir Wm. Vaughan acquired a grant in Newfoundland in 1616, sent out some settlers in 1617-18 and went there himself in 1622, sending home his 'Golden Fleece,' an allegory in praise of the Colony. He returned about 1629 to advocate its claims, and published his 'Newlander's Cure' in which he gives some of his experiences. He hoped that London and Bristol merchants would settle there "some ironworks, glass houses and for making of salt," also that Lord Falkland, Sir Henry Salisbury and other gentlemen of North Wales would proceed to do somewhat in that country. The work, which is inscribed to his brother John, Earl of Carbery, is in two parts, the first in prose, the second in verse.

A remarkable journal of incidents and occurrences in six voyages to and from Labrador and during a residence of nearly sixteen years (1770-86) on those shores with hunting, trapping, and fishing experiences, particulars of the country and its inhabitants, some of whom were brought to England and exhibited in London. The author made great gains but his losses were heavy, by shipwreck and by depredations—on one occasion (in 1778) his stores, goods, and men were carried off to Boston by an American privateer. The third volume contains the author's thermometrical observations for several years, and his poem 'LABRADOR: A POETICAL EPISTLE,' perhaps the first effusion of the sort from that country.

- 861 [**MANUSCRIPT.**] Superscribed in another hand: "Mr. Nelson's Letter to the Duke of Shrewsbury about the state of the North Parts of America." 9 leaves, folio, calf. Circa 1695 £6 6s

Mr. John Nelson, the writer of this letter not being fortunate enough to get an interview with the Duke of Shrewsbury—William the Third's principal Minister, here places his knowledge on the state of affairs in the North Parts of America on paper—suggesting what should be done to secure the present British possessions against the French, to conciliate the Indians, and to encourage the fur trade. Having been conversant with the French in Nova Scotia, Acadia and Canada for twenty-six years he was, he says, sent in 1691 to Port Royal (Louisbourg, to assist Commandant Col. Tyng, but was captured at sea, taken to France, and imprisoned for nearly five years in the Bastille. He had conversations with important personages there, and was acquainted with their views and opinions. He refers to their treatment of the Indians, some of whom had been brought to France and entertained there; six of them were being taken back by Mr. D'iberville "a very enterprising person." He thought some of the Indians should be brought to England and shown some of the sights of London, &c.

- 862 [MANUSCRIPT.] "*A Scheme or Method for the Reduction of Canada, wherein I shall begin by setting down the state, circumstances, and Situation of that Country,*" &c. Addressed to the Duke of Shrewsbury, 8 leaves, folio, calf. Circa 1695 £4 4s

A combined sea and land attack was advised—the land expedition to march from Albany, taking Fort Chambly and Montreal on its way to Quebec,—this force to consist of 1,500 English and 500 Indians. In sight of Quebec it was anticipated that the fleet would have at least another 2,000 men. The writer describes the difficulties of the route, the obstacles in the shape of French soldiers and settlers to be met. He computes the whole number of the Canadians as not above 2,000 families. Divers descents were to be made "whereby to ruine the country, by burning houses, destroying cattle and spoiling harvests," which was all the inhabitants had to subsist on, in the absence of supplies from France. The brute! The document is unsigned.

Admiral Hovenden Walker commanded the unfortunate expedition which sailed from Boston in 1710 for Quebec, intending the conquest of Canada. Half his vessels were wrecked in the St. Lawrence, and, returning to England, his ship the "Edgar" blew up at Spithead with the loss of most of his crew and papers. His case was much misrepresented, and not caring to contest it, having no powerful friends, he went out to Carolina, but afterwards returned and published this vindication. He died of a broken heart in Dublin, Jan., 1726.

"Mr. Whympers has always something intelligent to say, and being an artist as well as a traveller, his illustrations afford a vivid representation of the scenes which he describes. Of Vancouver's Island, where he spent three winters, his account is as graphic as any we have met with. The most valuable portion of Mr. Whympers' work relates to his sledge journey to the Yukon, which has all the freshness of a traveller's narrative in a land generally unknown."—*Daily News*.

OFFERED BY

FRANCIS EDWARDS

83, High Street,

MARYLEBONE, LONDON, W.

TO COLLECTORS AND LIBRARIANS.

THE present Catalogue contains titles of Books and Publications relating to the **United States of North America**. So large a Collection might for some reasons have been catalogued in alphabetical order under Authors, but as many are anonymous, and the items cover and illustrate three centuries of Colonial and National History, they have been grouped under headings representing distinct Periods—a natural and, it is hoped, a more convenient arrangement.

To enumerate important items would be to make another Catalogue. Attention may, however, be directed to a Latin 'De Bry' (p. 143); a Spanish Diplomat's Collection of Papers relating to Georgia (p. 145); B. F. Stevens's reproduction of a Map of New York, 1782 (p. 191); and Facsimiles of Manuscripts belonging to the Revolutionary Period (p. 199); to a valuable manuscript account of Carleton's and Burgoyne's Two Campaigns (p. 173); set of Faden's War Maps (p. 180); fine copies of Dr. Smith's 'New York' (p. 164); John Smith's 'Virginia' (p. 165) and that of Stith (p. 166); Lawson's 'Carolina' (p. 152) and Lechford's 'New England' (p. 153); Joutel's 'La Salle' (p. 163) and Hennepin (p. 149); Mather's 'Indian War' (p. 155); to sets of the Philadelphia 'Portfolio' (p. 213), Almon's 'Remembrancer' (p. 171), the 'Annual Register' (p. 171), and British 'Army Lists' (p. 172), as well as to the numerous rare pamphlets on American Taxation and the Revolutionary War scattered through the Catalogue.

The **First Part** of the Catalogue contained the Sections on the AMERICAN CONTINENT GENERALLY; VOYAGES OF DISCOVERY; NATURAL HISTORY; ANTIQUITIES; NATIVE RACES AND THEIR LANGUAGES. The **Second Part** was devoted to the DOMINION OF CANADA AND NEW-FOUNDLAND; ALASKA AND YUKON TERRITORY.

Other Sections (WEST INDIES, MEXICO, CENTRAL and SOUTH AMERICA) will follow shortly.

1411 [GEORGIA AND FLORIDA] A Collection of Thirty-four Official Papers and MS. Copies of Documents (as undernoted), with POFLE's Map of North America, 1 vol. folio, vellum. 1736-39 £40

This collection, evidently made by a Spanish diplomatist, contains various papers relating to the rupture between Great Britain and Spain, which arose out of illicit traffic and abuse of trade privileges permitted to vessels of the former in the West Indies, as well as from the alleged infringement of boundary engagements by the establishment of the new colony of Georgia between Carolina and the Spanish territory of Florida. On the part of Spain there was a natural desire of conciliation, but England demanded £200,000 for damages, against which Spain had an old claim of £60,000. The English ministers, desiring prompt payment instead of promised assignments upon future American revenues, agreed to accept £95,000.

An appeal by a society of noblemen and gentlemen for funds on behalf of over 100,000 destitute and ignorant Germans who had transported themselves from the Rhine countries, Wirtemberg, Saxony, &c.—"above thirty thousand of them within the last ten years, and in one single year, 1750, more than ten thousand"—and had dispersed themselves all over the Province of Pensilvania—in Philadelphia, Germantown, Yorktown, Readingtown, Easttown, and Newtown; also in Fredericktown in Maryland and Fredericktown in Virginia. The Dutch States-General, King George II., the Princess Royal, and the Church of Scotland had contributed money for ministers, schoolmasters, and books. Subscriptions received at Hankey's and Hoare's banks.

The Appendix states that Governor Hamilton, Chief-Justice Allen, Richard Peters (Sec.), Conrad Weyser (Interpreter), Benjamin Franklin, and the Rev. Prof. Wm. Smith had been chosen trustees; several schools were already open, and the Rev. Michael Schlatter appointed visitor and supervisor. "From the good disposition shown by many of these German emigrants.....and the warm thanks expressed.....one may reasonably infer what is the most certain way to unite the whole body of them amongst themselves, and in their attachment to the British constitution and nation."

He did not, however, complete his work—his Expedition to the Iroquee and Niagara were still "to come" when the third volume was issued. This translation is complete as regards America, except in a few trifling matters—the way of eating oysters, the art of making apple dumplings, which struck the Swedish gentleman with their novelty.

- 1443 **KER** (John), of Kersland.....Memoirs of, containing his Secret Transactions and Negotiations in Scotland, England, the Courts of Vienna, Hanover, and other Foreign Parts, *portrait and map*, 3 vols. 8vo, calf. 1726 £1 16s

John Ker was a spy, and is credited with being in the pay of the Jacobites as well as of the Government. The work does not bear the publisher's name, but was issued by Curll, who met with Ker in the King's Bench prison, where the latter, threatened with a prosecution for libel after the issue of the first volume, shortly after died, leaving the other two volumes in MS., which were soon after also issued by Curll, who was at once, as an offender in publishing other "immoral" books, taken into custody, tried, and pilloried—as he gave out, for "vindicating the memory of Queen Anne." (See *Notes and Queries*, 2nd Series, vol. iii.)

To the first volume (pp. 149-180) is added an Account of the Austrian (Ostend) E.I. Company; the second volume is largely devoted to a discussion of French policy in America, particularly in the Settlement of Louisiana on the Mississippi (with map), in the Newfoundland Fishery, Nova Scotia, St. Domingo, &c., with comments of laws, schemes, and character.

Bound up with the third volume is a work (seemingly unknown to Watt, Lowndes, and Allibone) entitled *Remarks on the Government* of several parts of Germany, Denmark, Sweden, Lubeck, and Hanseatick Towns, but more particularly of the United Provinces, &c., by WILLIAM KER, Esq., late Consul for the English Nation at Amsterdam. Printed in *Amsterdam*.....1688. Reprinted at London, 1727, 8vo (160 pp.). Then follows the Pleas against Curll at Westminster for libel in publishing the first volume (16 pp.).

- 1446 **LA HONTAN'S** *New Voyage to North America. Reprint of the English edition of 1703, with Introduction, Notes, and Analytical Index*, by Dr. R. G. Thwaites, *facsimiles of original title-pages, maps, and plates*, and a Bibliography, 2 vols. 8vo, cloth, gilt tops. Chicago, 1905 £1 10s

Dr. Thwaites thinks that La Hontan's story of his discovery of the "River Long" (a N.W. tributary of the "Missisipi") is a myth, and intended as a satire on the pretensions of other travellers. His map shows that he travelled by the portage of "Chegakou" to Fort Crevecoeur, on the "Riviere des Illinois," and sailed on the "Missisipi" as far as the "R. des Missouris," perhaps on the "R. de Ousconsink." The rest of his interesting, and in parts amusing, narrative of journeys in "New France" during the last twenty years of the seventeenth century is no doubt fully authoritative.

For original issues see CANADA, p. 103.

First edition, with dedication to Speaker Onslow, and Appendix of original Papers.
Relates chiefly to the difficulties which arose out of the wars with France and the Indians and necessary subsidies; of Washington's defeat; Braddock's expedition and defeat; granting of supplies to the Crown; Sir Wm. Johnson's treaty with the Indians. Account of moneys paid by the Province for H.M. Service, from the commencement of hostilities by the French, 1754-58, £327,851 less one-third—the English shilling passing for 1s. 6d. in Pennsylvania—sterling £218,567.
Attributed to Franklin, and printed in Sparks's edition of his works, but in a letter to Hume, 27th Sept., 1760, Franklin disowns it. The names of Dickinson and Galloway have been suggested for the authorship. The last-named, however, was a loyalist. The omission of the dedication in a second edition would seem to indicate that it was not by a loyalist; and the fact that the dedication is signed "For the Province of Pennsylvania, as well as in my own private Capacity," that the dedication was Franklin's.
"There was little doubt that Franklin furnished most of the material, and that it was printed, published, and circulated under his direction.....It was doubtless put into shape by his son William and by his old friend Ralph."

A rendering of the *Christus Patiens* of Hugo de Groot or Grotius, which tragedy is said to have been founded on a work written in Greek by Gregory Nazianzen. Sandys has been praised as highly for his personal character as for his poetry. According to Izaak Walton "posterity is beholden to his pen by a learned relation and comment on his dangerous and remarkable travels [in the Holy Land, &c.] and for his harmonious translation of the Psalms of David, into most high and elegant verse." But he is, perhaps, better remembered to-day for his translation of Ovid, which also is noteworthy as the first important poetic composition produced by an Englishman on the American continent, Sandys residing at the time he made it (1616?) on the James River, Virginia.

An officious pen has, for some reason, altered the printed date to 1643.

A Cambridge M.A., after being several times silenced for his nonconformity, he emigrated to America in 1635, settling at Cambridge, Mass., where he died in 1649. The sermons in this volume were preached in a weekly lecture begun June, 1636, and ended May, 1640.

Nearly all his writings are saturated with the brine of the deep sea. The last volume of this edition contains his own narrative of 'The Expedition against Carthage' and his biting political satire 'The History and Adventures of an Atom.'

- 1564 [—]** *The History and Adventures of an Atom, 2 vols. 12mo, calf, gilt edges. 1769* £4 4s

'The History and Adventures of an Atom, by Nathaniel Pocock,' was issued in 1769, though antedated by twenty years (1749). In this work the folly, knavery, and patriotism of the period are ridiculed. The three Georges and the Duke of Cumberland, Chatham, Grenville, Newcastle, Sandwich, Anson, Albemarle, Hawke, Boscowen, Byng, Burgoyne, Braddock, Wilkes, Clive, Amherst, Wolfe, Sir Wm. Johnson, are all introduced into the 'History,' under Japanese or Chinese names, the geographical names being similarly disguised. Thus England is Japan, North America—Fatsisio, France—China, Louisbourg—Chinafort, Spain—Corea, Gibraltar—Foutao, Portugal—Fumma, Windsor—Jedoo, London—Meaco, Great Britain—Nippon, Paris (whither the author hurried to escape prosecution)—Pekin, Quebec—Quib-quab, Russia—Tartary, Thin Quo—Martinique, Hanover—Yesso, &c.

- 1565 SOTO.** *Discovery and Conquest of Terra Florida by Don Fernando de Soto and Six Hundred Spaniards, his Followers, written by a Gentleman of Elvas, and Translated out of Portuguese by Richard Hakluyt. Reprinted from the Edition of 1611, with Introduction, Notes, and Translation of Luis Hernandez de Biedma's Narrative of the same Expedition, by W. B. Rye, map, 8vo, cloth (Hakluyt Soc.). 1851 (scarce)* £2 16s

The original issue of Hakluyt's Translation of this work appeared in small 4to, London, 1609—*Virginia Richly Valued by the description of the maine land of Florida her next neighbour; out of the four yeeres continuall travell and discoverie for above one thousand miles east and west, of Don Ferdinando de Soto, &c.*

Mr. Rye's introduction contains accounts of the different translations of the work and of the discoverers who preceded De Soto—Ponce de Leon, Alvarez de Pineda, Vasquez de Ayllon, Pamphilo de Narvaez, and Cabeza de Vaca.

The map, which is a modern one, shows De Soto's supposed route through parts of what are now the States of Florida, Georgia, South Carolina, and Alabama, to the Mississippi, near its junction with the Arkansas river. Westward of the Mississippi the route is difficult to trace.

The author, who was on a missionary journey for the S.P.G., arrived in New York on August 29, 1745, after a passage of seven weeks. He was pleased at seeing so much elegance and politeness in that city; describes the province of New Jersey as well cultivated as any of the colonies, well wooded; the capital, Perth Amboy, as delightfully situated on a fine harbour, but a place of no trade; and the people as brisk, of a lively temper, and superior to our countrymen of the same rank. Thefts and robberies were rare and pocket-picking unknown, all the rogues and villains transported from England being landed in Virginia and the Southern colonies. He also describes the climate, the sumach tree, the fire-flies, the foods and vegetables, Dutch beer, and the rattlesnake.

- 1587 **WILLARD.** A Compleat Body of Divinity in Two Hundred and Fifty Expository Lectures on the Assembly's Shorter Catechism; wherein the Doctrines of the Christian Religion are unfolded, their Truth confirm'd, their Excellence display'd, &c.....By the Reverend and Learned **SAMUEL WILLARD, M.A.**, late Pastor of the South Church, folio, full calf (rebacked). *Boston in New England, 1726* £6 10s

The first folio volume issued in America, and of over 900 pages, it was printed on several presses (and is not quite correct in its pagination); it contains an Exact List of Subscribers (about 450) and (at the end) a Catalogue of the Author's published works (44 in number). As most of these had "long since been bought up," the editors proposed, "upon due encouragement seasonably given to the Publishers (B. Eliot and D. Henshman), to reprint the whole "in one volume."

This copy, though aged, is complete, and in comparatively fine condition. The title-page is printed in red and black.

A work deserving a place by the side of the folios of St. Augustine, Calvin, Lightfoot, and other great doctors and divines, inasmuch as it was the first "body of divinity" produced in America.

Pastor Willard was for several years Vice-President of Harvard, and somewhat in advance of his times, for he opposed the proceedings in the witchcraft persecutions. The work is prefaced by the author's successors, and by a fine tribute to his character from the funeral sermon on his death.

A sound set. The parts recording events of the American Revolution are usually attributed to BURKE, and begin in Vol. XIX. Dr. Smyth considered this the most concise, able, impartial, and authentic history of the dispute to be found. According to Dr. Gordon (preface, Vol. I.) "The Americans remarked that Dodsley's Annual Register, 1788, contained the best foreign summary account of their affairs," though it "was not possible for writers on this side the Atlantic to avoid mistakes." The same writer adds that he frequently quoted from the 'Register' "without varying the language except for method and conciseness." Others did the same. The war sections of the 'Register' form the ground work of 'The History of the War in America,' 2 vols., Dublin, 1779 (see p. 185), as well as of 'An Impartial History of the War,' London, 1780 (see p. 186).

"Those who read or write about the American Revolution must feel it almost an impertinence to define their obligations to Mr. Bancroft, and to specify the items of the debt which they owe him. His 'History of the United States of America' supplies a vast mass of detail, illuminated by a fine spirit of liberty, which is inspired indeed by patriotism, but is not bounded in its scope by any limitations of country or of century."—TREVELYAN, 'American Rev.,' i. 90.

Of a noble Irish family, Colonel Hanger was educated at Eton and in Germany. Entering the foot guards, he afterwards joined the Hessian corps, and served in America under Clinton, Cornwallis, and Tarleton. He met Major André and other chief actors. In conversation with General Dickinson he asserted that when the inhabitants of the country became more numerous and powerful, "the Northern and Southern powers would divide and contend in arms." Returning to England he became Equerry and a boon companion to the Prince of Wales, a friendship which did not keep him out of a debtor's prison. His book, which is said to have been compiled by Combe, author of 'Syntax's Tours,' contains much advice for the correction of immorality, and a representation of himself (vol. i. p. 2) hanging on a gibbet. Subsequently to its publication, the Colonel succeeded to the Barony of Coleraine, but refused to assume the title. He died in 1824.

Reproduced with their corrections, emendations, their seals and endorsements, they are so like originals that in some cases it is almost impossible to believe they are not. In going over them the student may apprehend something of the mind and methods of the writers—American patriots and English loyalists, fathers of the Republic, King George himself, his ministers and their secretaries, generals, statesmen, colonial governors, foreign diplomats—the men who made the history of those times, and conducted the great struggle through all its issues to the re-establishment of peace. A large proportion of the documents have never been printed; some have been printed in part only.

Only 200 sets were issued for subscribers.

"The more this work is examined the more wonderful it seems. If it were the undertaking of a great Government, backed by all the forces at its command, it would be considered a magnificent thing; as the effort of one man—an American—it is a stupendous monument to human knowledge, historical zeal, and self-denying labour and devotion."—*Connecticut Historical Society*.

1964 **WALPOLE**. *Letters of Horace Walpole, Fourth Earl of Orford*, edited by Peter Cunningham, *portraits*, 9 vols. 8vo, cl. 1891 £5

In Walpole's Letters (Vols. VI. and VII.) covering the nine years of the conflict with the American Colonies, the pulse of the English nation may be felt on the subject from its beginning. On the Boston "tea-chest" affair there was general indifference, but excitement on the receipt of news of the open rebellion of the Colonists. Speeches for conciliation, or for withdrawing the troops, had no effect on the popularity of the war; contradictory rumours of successes and defeats caused uneasiness and distrust of generals; French action produced a gradual belief in the folly and madness of the dispute; and there was a feeling of hopelessness when there was seen to be no possibility of recovering any of the Colonies; while disaster upon disaster—Ticonderoga and the defeats of Burgoyne, Gates, the incident of Arnold and André, and Cornwallis's surrender—left the Country in a most miserable state of depression.

There are references throughout these volumes to the beginnings and causes of the American discontents; debates on the Stamp Act are reported "with a vivacity and apparent correctness which may be sought in vain elsewhere"; capture and recapture of Newfoundland and conquest of Havannah (1762); Taxation of the Colonies (1764); Commencement of the Troubles with N. America (1765); Petition from the Colonies, first Speech of Burke, and Debate on the Five Resolutions (1766); Desultory Discussions, Project of using Force, Taxation Proposals, and Massachusetts Act. Thirty volumes are bound in half red morocco, the others in the original half-calf (6 being uncut).

This periodical, to which the long, and, up to that time, unique existence of twenty-seven years was accorded, originated with Mr. Joseph Dennie, one of the first men in America to give his life to literature. He gained a considerable reputation as a man of letters, and for his comparative excellence he was termed the American Addison, and is said to have had the not unusual recompense—*permission to starve*.

The publication was continued by one or more of the "friendly confederacy" of his assistants. Mr. John E. Hall took up the editorship in 1816, and continued it till 1827, when, his health giving way, the publication ceased.

Beginning with 1,500 copies, the issue was afterwards increased to 2,000, but delinquent annual subscribers of \$5 and \$6, who did not pay up, and the depreciated paper of those who did, always kept the founder in a struggle for life. It first appeared weekly in 4to, 1801-5 (5 vols.); afterwards in 8vo, weekly, 1806-8 (3 vols.); then a new (third) series, monthly, with portraits and plates, 1809-15 (7 vols.); Hall's Series, 1816-27 (22 vols.), completes the set, which is in fine condition, and, with the exception of a plate or two missing, may be considered perfect.

The contents, original and selected, are varied, being "dedicated, in chief, to the popular departments of science, combined with occasional criticism, classical disquisitions, miscellaneous essays, records of the progress of the fine and useful arts, polite literature and wit. These include descriptions (illustrated) of scenery, biographies (with portraits) of American statesmen, clergymen, naval and military commanders, travels on the continent of Europe, reviews of books, extracts from the *Edinburgh Quarterly*, and English critical reviews, &c. The later volumes contain coloured plates from Wilson's 'American Ornithology.'

This composition is usually attributed to Sydney Rigdon, one of the founders with Joseph Smith of the Mormons or Latter-Day Saints; it has also been asserted that Rigdon elaborated it from a religious romance written by one Solomon Spaulding, Congregational minister—a romance founded on the theory of the Israelitish origin of the American Indians. The manuscript, submitted to a Pittsburg printer, in some unexplained way fell into the hands of Rigdon; he, it is said, made it helpful as a new revelation in establishing the new church. Mr. Woodbridge Riley (see p. 236), however, argues that Smith's inherited mentality, his environment and visions, and his reading enabled him to write the book himself, and points out the fact that he inadvertently claims the authorship on the title-page of the *first edition*. A facsimile of this is given by Linn (see p. 231). Later editions were revised, and two or three thousand corrections made in the book by Smith and his associates: he does not claim the authorship on the later editions.

Journal* (see No. 2626). Mr. Bollaert then made the journey into the interior of Texas above narrated. His observations on the Indian tribes appeared in the *Ethnological journal*, and those on the geography and botany of Texas in the *R.G. and Linnean Societies' publications*. His 'Personal Narrative' was never published. Going out again to South America, he made antiquarian and ethnological researches in New Granada, Ecuador, Peru, and Chili. Recrossing the Andes, he next visited the Argentine Republic, Paraguay, and Brazil. The scientific results of these journeys were published, and will be catalogued in the *South American Sections*. Mr. Bollaert subsequently wrote 'An Account of the Wars of Succession of Portugal and Spain, 1826-40,' 2 vols., London, 1870.

RELATING TO

**MEXICO, CENTRAL AMERICA
THE WEST INDIES
& GUIANA**

"It is to Mexico that we turn, and turn again, with delight....We disguise not our admiration of her; we conceal not our affection for her. We have visited her, and we have found her sons our friends, our admirers, our disciples."

"Cuba.....will become an independent power under the protection of the United States."
WILLIAM DAVIS ROBINSON, Philadelphia, 1820.

"The West India Islands will one day belong to America."—Abbé RAYNAL, 1774.

"The Caribbean Sea was the cradle of the Naval Empire of Great Britain.....In those waters the men were formed and trained who drove the Armada through the Channel into wreck and ruin. In those waters, in the centuries which followed, France and England fought for the Ocean Empire, and England won it. ...If ever the naval exploits of this country are done into an epic poem—and since the 'Iliad' there has been no subject better fitted for such treatment or better deserving it—the West Indies will be the scene of the most brilliant cantos."
FROUDE, 'The Bow of Ulysses,' 1888.

The volumes appeal to all lovers of sumptuous books, attracted by the wealth of interesting and beautiful illustrations, to architects and artists, as well as all public libraries and institutions.

- 2662 **COCKBURN** (Sir George) Account of the Outfit for Voyage, and other Expenses of His Majesty's Commissioners for Mediation in Spanish America [Messrs. Cockburn and Sydenham] and of the Secretaries, Servants, &c., between 1 October, 1811, and 1 September, 1812, (a) Rough Draft of Account with Alterations, four leaves, folio £2

The Account includes personal allowances of £2,000 to Mr. Sydenham, £500 to Mr. Hoppner, principal Secretary, and £200 for private Secretary; travelling carriage, £440; linen, £326; two canteens, £457; various items of provisions, preserves, salt, &c., £920; stationary, £287; despatch boxes, £54; wines, ales, &c., £630; soda water, £6; filtering machine, £13; furnishing cabins, £510; servants' wages, £196; steward's bill, £91; live stock and forage, £510; other expenses, London, Chatham, and Portsmouth, £459; house rent, table, &c., at Cadiz, £1,390, as well as an additional £555 to the 2nd Commissioner (Mr. Sydenham), £90 for Mr. Hoppner's secretary, and £62 for Mr. Addington's secretary at Cadiz. These, with other items, total £10,606 15s. 0½d.; allowance for silver and linen resold, £350 16s. 1d., makes this account £10,255 18s. 11½d., the surplus of wine and stationery being delivered to Sir Henry Wellesley at Cadiz and the carriage returned to Hatchet & Co., Long Acre. The 1st Commissioner's personal outfit was only £442, on the whole very reasonable charges compared with some more modern "mediating" missions. A sum for Sir G. Cockburn's services on the occasion, though nothing resulted, would, no doubt, be voted by Parliament.

- 2665 — Another, clean, copy of same, 12 pp. folio £3 10s

Sir George states his opinion, in obedience to his Lordship's commands, with extreme deference; suggests that any further mediation with Spain would cause delays and insurmountable difficulties; action, if taken at all, should be immediate, as the Insurgents in New Spain (Mexico), now 100,000 strong, would not lay down their arms without being guaranteed practical independence and British protection; the point of next importance being the necessity of taking immediate measures to prevent New Spain falling into other hands or forming too close a connexion with the United States, "there are now 300 North American officers serving in the armies of the Mexican insurgents.....American vessels have also arrived at Buenos Ayres with arms," &c.

- 2714 [**MINA.**] *Journal of the Expedition and Military Operations of General Don Fr. X. Mina in Mexico 1816-17. MANUSCRIPT, neatly written, 205 pages, folio, rough calf. [Circa 1821]* £25

The manuscript opens with an introductory account of the country and of the revolutionary proceedings of the insurgents under their leaders Hidalgo, Morelos, Garcia, Guadalupe Victoria, and others. This is followed by a narrative compiled from the Journal of one of Mina's English companions, MR. JAMES A. BRUSH, who accompanied the young soldier from Liverpool to America—where, at Baltimore, Philadelphia, and New York, they received an accession of volunteers. They then sailed for Port-au-Prince, Hayti, the rendezvous of the Expedition. The narrative from October, 1816, relates the further proceedings of the adventurers at Galveston, at New Orleans, and on the coast of Mexico, where a landing was effected at the mouth of the River Santander, May, 1817. The march of the Division to Soto la Marina and across mostly barren country; engagements with the Royalist troops, which, though greatly exceeding in number Mina's small force, put to flight; and other minor actions are minutely and truthfully recorded. Receiving little assistance from the Mexican patriots themselves, he was eventually captured, and executed by order of the Viceroy, November 7, 1817. The rest of the MS. is taken up with a general account of events in Mexico to the beginning of 1819, when the author left the country. Mr. Brush's MS. Journal was used by Mr. Wm. Davis Robinson in the preparation of his 'Memoirs of the Mexican Revolution' (2 vols. 1821), which contains a portrait of Mina. See p. 267.

This MS. was formerly in the possession of Admiral Sir George Cockburn.

"The chronicles of Père Labat has been a treasure house full of interesting accounts of scenery, animals, and people from which subsequent writers have not hesitated to enrich their pages.....Labat spent two years at Martinique, then, in 1696, passed to Guadeloupe, where he established a station of the Dominican Order, with which he was connected, and distinguished himself as an agriculturist and an engineer. Returning to Martinique, he became *procureur-général* of the mission, and was held in high esteem by successive governors for his diplomatic and scientific services. He explored the archipelago of the Antilles, founded in the year 1703 the city of Basse-Terre, and in the same year made himself felt in the conflict with England for possession of the island. Relates to the mismanagement of one of the British squadrons operating against France in the West-Indies. Commodore Wilmot sailing from Jamaica with 1,200 troops under command of Col. Lillingston attacked the French in St. Domingo and captured two forts, but nothing further was achieved owing to disagreement among the officers. Analyses of documents relating to the transactions will be found in Col. State Papers, West Indies, 1693-96. These the editor (Mr. J. W. Fortescue) says, are insufficient to clear up the extraordinary story without the help of Lillingston's pamphlet, and adds, "That his story is the true one.....I cannot doubt."—Pp. xxxviii-xliv.

IMPORTANT MANUSCRIPT DOCUMENTS.

- 3291 MELVILL (General Robert) Letter and Order Books, Correspondence (Official and Private), 4 vols. folio, rough calf, 2 vols. 4to, vellum, and a bundle of Original Letters and Reports** £25

General Melvill, born 1723, served with the Edinburgh Regiment (now King's Own Scottish Borderers) in Flanders, and at Antigua, in the West Indies. Major of the regiment, he captured Guadeloupe in 1759, and became Lieutenant-Governor and Governor of that island, 1760, and subsequently governor of the ceded Caribbee Islands—Grenada, the Grenadines, Dominica, St. Vincent, and Tobago, till July, 1771, when he returned to England. On the loss of Tobago, in 1781, he was sent, with Sir Wm. Young, to France to negotiate indulgences for the English settlers, whose interests in the re-cession had been overlooked. General Melvill, who died 1809, the oldest general in the British Army, was the inventor of the naval gun known as a "carronade"; he established the botanic garden at St. Vincent, was an active member of the London Society of Arts, and a well-known public character in his time. His "life" will be found in Anderson's 'Scottish Nation'; he is sketched in Kay's 'Edinburgh Portraits,' and in Moore's 'Views of Society and Manners' (2 vols. 1780).

The dedication is signed by de Rochefort, and is usually assigned to him; and (*vile* Barbieri) le Père du Tertre, in his history, confirms this, and the Lyons reprint, 1667, has the name of Rochefort on the title-page, but the learned Aëlle says the true author is Louis de Poincy. Davies, in his English translation, refers it to divers authors, who had delayed the publication, and included in it recent Observations and Relations, as well as private discourses with Father Raymond, especially in the moral part; he also gave them the Caribbean vocabulary. Barbier, on the authority of a Paris catalogue (1867), assigns the vocabulary to Père Breton. For English translation, see DAVIES, p. 293.

RELATING TO

SOUTH AMERICA

"Yet I will venture on a not ungrounded hope that the venturesome Confederations and Republics of the American South may have before them a nobler destiny than has yet been apportioned to their counterpart on the Northern Continent,—higher aims, and wider fulfilment.....Terrible as is the price that a nation is at times called upon to pay for worthiness, that nation does well to pay it, rather than forfeit what alone makes existence worth the while."—GIFFORD PALGRAVE, 'Ulysses,' 1887, p. 246.

OFFERED BY

FRANCIS EDWARDS,
83, High Street,
MARYLEBONE, LONDON, W.

TO LIBRARIANS AND BOOKBUYERS.

HAVE much pleasure in presenting to my Correspondents at Home and Abroad another (Fifth) Part of my American Catalogue. This, illustrative of the Geography and History of SOUTH AMERICA, will be found, as far as English publications are concerned, fairly complete and representative of the different countries of that vast Continent, before and during their Revolution, and since their Independence.

The history of these young Republics, peopled largely by inhabitants of European origin—a New World called into political existence (as was well said by Canning) to redress the balance of Power in the Old World, cannot fail to be of interest to the student of Political Philosophy. In another sense, SOUTH AMERICA, with its Llanos and Pampas, its immense Forests, its mighty Rivers—the Amazon, the Paraguay, the Parana, and their great tributaries, will always attract the Physical Geographer and the Naturalist, and afford them unbounded fields for exploration and innumerable objects for patient observation.

As the titles have been arranged under political headings, and a number of works overlap these boundaries, some important items have been repeated, or mentioned in cross-references.

Since the preceding parts were issued I have purchased a large number of additional works relating to CANADA, THE UNITED STATES, and THE WEST INDIES. These will be included in a SUPPLEMENT, Part VI., to be issued shortly.

FRANCIS EDWARDS.

Africa)*, 12mo, calf, gilt edges. *Cleves*, 1660 £2

History of the Dutch expeditions against the Portuguese in Brazil, &c., in the seventeenth century, especially that of Prince Mauritz of Nassau, on behalf of the Dutch West India Company, 1637-44, expeditions which in the end failed, as their objects were for commerce only. Prince Mauritz captured Olinda and other settlements, laid the foundation of a fine city, built palace, bridges, &c., advised the Company to throw open the trade, and urged the necessity of the Dutch colonizing Brazil. His plan for an expedition to Buenos Ayres was frustrated by insurrections in Maranhão and St. Thomas. Barlæus, who describes Brazil and its inhabitants, has a brief relation of Brouwer and Herckman's expedition to Chili, the mines there, and the people, and adds a long Chilian-Latin vocabulary. On the failure and return of this expedition Herckman was sent by the Prince to explore the country near Pernambuco, where he discovered some antiquities. Barlæus also tells of simultaneous attempts to capture St. Paul de Loanda, in Angola (W. Africa), and of the counter Spanish and Portuguese expeditions.

Bound up with BENZONI—Historiæ Indiæ Occidentalis; tomis duobus comprehensa. Prior, res ab Hispanis in India Occidentali.....Gallos ad Floridam, &c. [Geneva], 1586. 1 vol. 12mo, calf* £2 2s

Lery tells the story of Villegagnon's expedition to Brazil, 1556. This adventurous Knight of Malta, sailing from Leith, having among his company three Scotchmen and a number of ministers chosen by Calvin, went out under the auspices of Coligny, whose object was to found a colony for the reception of French Huguenots. Entering the Bay of Rio Janeiro, Villegagnon took possession of the country, although the Portuguese were there before him, dreaming of a 'France Antarctique.' Villegagnon, under the influence of Cardinal Guise, quarrelling with the Genevan ministers, threw off his mask, and they with Lery returned home, thus disappointing ten thousand French Protestants ready to emigrate; and France thus lost the opportunity of colonizing South America.

3720 — Another copy, 3 vols. 4to, russia, rebacked. 1810-19 £2 14s

Southey's work comprehends the whole of the eastern part of South America—the country between the La Plata, Paraguay, and Amazons westward towards Peru. It is a cyclopaedia of all previous relations of its early discovery and exploration, and is supplemented by voluminous notes: for much of this information Southey's 'History' is still the only accessible source for English readers.

"Mr. Southey is doubtless the 'facile princeps' of the Historians of the Brazils; but this title is hardly commensurate with the bearing and extent of his work, as it comprises the rise and progress of all the European colonies, from the Andes to the Atlantic, and from the Plata to the river of the Amazons.....If the popularity of this great, and perhaps 'maximum opus' of its author, be slow, it will be sure.....When the Powers of Portugal and Spain, in the new world, shall be, as they are now threatened to be, NO MORE, then will the text of Mr. Southey's History of Brazil be considered as a beacon and a guide to the antiquarian, historian, and philologist."—DIBDIN.

Mr. Hutchinson visited every place of importance in Peru. He attributes the greater ruins to a civilization older than that of the Incas, who destroyed everything, and nowhere did he see a single yard of the stupendous roads described by Humboldt and Prescott. He also exposes other traditions and legends in relation to the Incas and to Pizarro himself; in fact, Cieza de Leon, Prescott, Stevenson, Tschudi, and Rivero should be read with Mr. Hutchinson's book at hand to test their statements. As to the origin of the Peruvian races, Mr. Hutchinson thinks more minute examination into the unbounded stores for research should be made by archæologists before coming to any definite conclusion. Papers on Peruvian Skulls by Prof. Busk and Dr. Barnard Davis, and on Peruvian Pottery by J. E. Price, are printed in the Appendix to Vol. II.

- 3957 **MEMOIRS OF GENERAL MILLER** in the Service of the Republic of Peru, by John Miller, SECOND EDITION, *portraits, maps, and plans*. PRESENTATION COPY, 2 vols. 8vo, half-calf. 1829 £3 3s

Copy presented "with the author's compts." to Colonel Sir Belford Hinton Wilson, son of Sir Robert Wilson, and aide-de-camp to General Bolivar. Col. Belford Wilson was present in several battles, and is mentioned at length in the work (Vol. II. pp. 334 *et seq.*). The second volume contains numerous important marginal notes in pencil and ink correcting or supplementing the narrative.

The binder has cut into some of these notes, but all are easily readable.

Subsequently Col. Wilson inscribed this copy to the Misses Porter. On the half-title of the first volume is written:—"A tribute of respect, admiration and gratitude to the talents and friendship of the Misses Jane and Anna Maria Porter from their affectionate Friend BELFORD WILSON, *Esher, 7-1829.*" At the back of title of second volume:—"A tribute of respect and admiration to the talents of the Misses Jane and Anna Maria Porter from their grateful Friend, BELFORD WILSON, *Esher, Sept. 7, 1829.*"

Underneath this is added, in pencil by another hand (not that of Jane Porter) "Miss Porter requests those who read these volumes they will be careful not to Erase any of the Memorandums as they may prove of the utmost importance to the after history of America when it shall become as it will under Divine Providence a great and powerful country. *June 1835.*" At the head of page 1 (Vol. II.), written in pencil by JANE PORTER, author of 'The Scottish Chiefs,' &c., is this note:—"Reader! Be careful not to rub out the pencil Notes in this Book. They are written by a Columbian Colonel who was present in all the circumstances described. *J. P.*"

Anson, "the veriest bull-dog of all circumnavigators," went out to plunder the Spaniards in the Pacific. Though he lost most of his men and vessels, it was reported that he returned laden with more spoil than had fallen to the lot of any previous commander. The narrative of the Chaplain, Walter, is believed to have been revised and re-composed by Mr. Benjamin Robins, to whom Mr. Walter's MS. extracts from the ships' journals were submitted by Lord Anson. The 'Introduction' and many dissertations in the body of the book were wholly those of Mr. Robins. See his 'Mathematical Tracts,' edited by Dr. J. Wilson, 2 vols., 1771, and several references in *Notes and Queries*.

Anson visited St. Catherine's Island (coast of Brazil), touched at the coast of Patagonia, and sailed round C. Horn to the Chiloean Archipelago and Juan Fernandez—on their terribly rough passage round the Cape losing sight of most of the squadron, the "Wager" being wrecked. (See BULKELEY, p. 399; BYRON, p. 399.) After refreshing at Juan Fernandez, several prizes were taken and the town of Payta plundered. The reduced squadron then proceeded to Acapulco, and crossed the Pacific to secure the Spanish galleon, which was captured and carried to Macao.

- 4069 — Second edit., corrected, 5 maps, 8vo, calf. 1718 (*fine copy*) £2 10s

This expedition, fitted out by advice of Dampier, who accompanied it as Pilot, was "the best concerted, the best conducted, and the most successful of its kind," having produced £170,000, half of which belonged to the proprietors. Proceeding to the Canaries and Cape de Verdes, the vessels, with a prize, crossed to the Isle Grande on coast of Brazil, and then made their way round the "Horn" to Juan Fernandez, where they found and released Alexander Selkirk after his four years' solitude. Not being able to effect any success against Callao, they went on to Puna and Guayaquil, surprised these towns and got much booty, but catching a malignant fever, 100 men soon being "down," were obliged to go off to the Galapagos to recuperate and to divide the plunder. After two or three months' cruising, taking several prizes, they sailed towards Acapulco and captured the Spanish galleon. They next cruised about the coasts of Mexico and California, and thence made their way across the Pacific to Guam (Ladrone Islands), the Eastern Archipelago, and Java, returning homeward round the Cape of Good Hope.

Woodes Rogers was captain of the "Duke" and Edward Cooke of the "Dutchess." For Journal of the latter, see p. 378. Both books describe the Isle Grande, Juan Fernandez, Chile, Peru, the Galapagos, Mexico and California.

The subsequent letters (transmitted through an agent in New York) relate how this vessel, meeting with a tremendous storm and putting into Monte Video and Buenos Ayres (1797) for repairs, was obliged to leave the author behind owing to illness, in the care of the Fathers of the Convent of St. Dominic, with whom he lived and travelled about the country for eighteen months till May, 1798. Landing at Buenos Ayres, Sir Francis Head proceeded across the Pampas to inspect the gold mines of San Luis and the silver mines of Uspallata beyond Mendoza. Returning to Buenos Ayres he received letters which necessitated a visit to Chili. Rejoining his party at Mendoza, he crossed the Andes to Santiago, and went up and down that country inspecting its mines. Once more recrossing the Cordillera, he rode across the Pampas to Buenos Ayres—journeys altogether of over six thousand miles. Though riding against time, he made valuable observations and notes of the countries and people visited.
